

Assignment

1.What is HTML?

HTML stands for Hyper Text Markup Language. HTML is the standard markup language for creating Web pages. HTML describes the structure of a Web page. HTML consists of a series of elements. HTML elements tell the browser how to display the content.

2.What is CSS?

CSS (Cascading Style Sheets) is used to style and layout web pages — for example, to alter the font, color, size, and spacing of your content, split it into multiple columns, or add animations and other decorative features.

3.Why did JavaScript come into the picture?

JavaScript is a scripting language that enables you to create dynamically updating content, control multimedia, animate images, and pretty much everything else. In comparison to Microsoft, who had Visual C++ for professional programmers and a Visual Basic scripting language for amateurs, Netscape wanted a simpler companion script to Java that mimicked what Microsoft was offering. This is where Brendan Eich, father of JavaScript, comes into the picture.

4. History of JavaScript and EcmaScript ?

JavaScript was invented by Brendan Eich in 1995. It was developed for Netscape 2, and became the ECMA-262 standard in 1997. After Netscape handed JavaScript over to ECMA, the Mozilla foundation continued to develop JavaScript for the Firefox browser.
