Assignment

1. what is the internet? Explain in your own words.

The Internet, sometimes called simply "the Net," is a worldwide system of computer networks -- a network of networks in which users at any one computer can, if they have permission, get information from any other computer (and sometimes talk directly to users at other computers).

2.what is a web browser?Explain in your own words.

A browser is an application program that provides a way to look at and interact with all the information on the World Wide Web. This includes Web pages, videos and images.

3.What is browser engine? Explin in your own words.

A browser engine is a core software component of every major web browser. The primary job of a browser engine is to transform HTML documents and other …

4.what is a static site?explain in your own words.

Static web pages are made of "fixed code," and unless the site developer makes changes, nothing will change on the page. Think of it like a brochure for a business. Static sites give a lot of the same type of information that you could get from a brochure, but it can't just change itself.

5.what is a dynamic site?explain in your own words.

A Dynamic Website (also referred to as a database-driven site) requires web programming and database design. A dynamic website contains information and content that changes, depending on factors such as the viewer of the site, the time of the day, the time zone, or the native language of the country the viewer).

No e: Please create a Google Document and write your answers and upload the shareable link of the Google   Document with view access during the submission of assignment
